PROFESSIONAL EXPERIENCE

Full-Stack Developer C# .NET MATY

04/2026 - 07/2026

- End-to-end development of business applications: scoping, design, development, testing and production deployment.
- Full-Stack design and development of .NET applications, REST APIs, business services and web interfaces.
- Creation of ergonomic, performant and user-centered interfaces.
- Design of technical solutions and modeling of complex business rules in collaboration with functional teams.
- Development of integration and automation flows between multiple applications within the ecosystem.
- Development of product data flows, SEO optimization and integration with e-commerce platforms.
- Optimization of SQL processing and queries to improve performance and maintainability.

Full-Stack Developer / Software Engineer INDEPENDENT PROJECTS

05/2024 - 04/2026

- Design and development of Full-Stack projects using C#/.NET, React, Next.js and Node.js.
- Design of a modular software architecture and development of complex systems.
- Development of modern, responsive and user-centered web interfaces.
- Graphic design, asset creation and Front-End integration.
- Development of APIs, third-party service integrations and dynamic document generation.
- End-to-end project ownership: design, roadmap, development and production deployment.
- Projects: braineatersgame.com • paulnelaton.com

SecOps Engineer VINCI AUTOROUTES

11/2019 - 06/2021

- Automation of security controls, reporting and dashboards.
- Design of patch management and system hardening processes.
- Implementation of centralized log collection and analysis using ELK.
- Security operations on critical infrastructures (OIV).
- Vulnerability management and remediation (Qualys, Alsid).
- PAM / IAM administration (CyberArk).

DevOps & Automation Engineer

06/2018 - 12/2018

BRITISH TELECOM

- Automation of detection workflows through REST API integration.
- Interconnection of SIEM platforms (RTIR, TheHive, ELK).
- Network compliance automation using Ansible.
- Development of orchestration scripts and internal tools.
- Technical documentation writing in an international environment.

Network Security Engineer

02/2017 - 04/2018

ORANGE CYBERDEFENSE

- Operational maintenance of security infrastructures.
- Administration of network security solutions: firewalls, proxy and DNS.
- Incident and request management across an international scope.
- Use of management and monitoring tools.

Network & VOIP Administrator

11/2016 - 12/2017

5ÈME AVENUE

- Deployment of network, security and VOIP infrastructures for SME clients.
- Planning, coordination and execution of technical interventions.
- Client interface for requirements definition and project follow-up.
- Contribution to the design and launch of an IP telephony offer.
- Training on project management fundamentals.
