EDUCATION & CERTIFICATIONS

2016-2017
Training
SFR - Telecom Deployment Project Manager

2016
Engineering Degree - Systems, Networks & Security
AFTI (Orsay)

2015
Bachelor's Degree - Computer Science
University of Franche-Comté

TECHNICAL SKILLS

Product & Platform

Product vision | Technical roadmap | Tooling automation | Jira / Confluence | Technical documentation | Agile methodologies

Software Development

C# / .NET | Typescript | React | Next.js | REST APIs | UI/UX | Git

Automation & DevOps

Python | PowerShell | CI/CD pipelines | Workflow automation | API integrations

LANGUAGES

French : Native

English : Professional proficiency

Portuguese : Fluent

PROFESSIONAL EXPERIENCE

Software Engineer & Product Owner — *2024 - Present*

INDEPENDENT PROJECT

- Design and development of a complete software project (C# / Unity).
- Design of core systems and overall technical architecture.
- Ownership of the technical roadmap and project structuring.
- Continuous improvement through iterative development.
- Definition of product vision with strong focus on user experience.
- UX optimization and feature clarity improvements.
- Development of a fullstack web interface (React / Next.js).

SecOps Engineer — *2019 - 2024*

VINCI AUTOROUTES

- Technical leadership for security implementations on critical infrastructures (OIV).
- Security needs analysis and definition of remediation strategies.
- Coordination with system and network teams for solution deployment.
- Industrialization and automation of security controls.
- Centralization and analysis of logs using ELK to improve detection capabilities.

Cybersecurity & DevOps Engineer — *2018 - 2019*

BRITISH TELECOM

- Automation of detection and escalation workflows through API integrations.
- Integration of SIEM platforms and SOC tools (RTIR, TheHive, ELK).
- Automation of network and security equipment compliance using Ansible.
- Technical prototyping and contribution to architectural decisions.

Network Security Engineer — *2017 - 2018*

ORANGE CYBERDEFENSE

- Operational maintenance for Air Liquide's global security infrastructure.
- Firewall administration (Checkpoint, Cisco ASA, Fortinet, Palo Alto).
- Proxy management (Zscaler) and DNS security solutions (F5).
- N1/N2 incident management in a global multi-site environment.

Network Engineer & Junior Project Manager *2016 - 2017*

CINQUIÈME AVENUE

- Management of telecom infrastructure deployments for clients.
- Planning and organization of technical interventions.
- Direct client interface for requirement definition and deployment follow-up.
- Participation in the design and launch of a new IP telephony offering.
- Internal SFR training on project management fundamentals.
