PROFESSIONAL EXPERIENCE

Full-Stack C# .NET / React Developer

04/2026 - 07/2026

MATY

- Development and modernization of C#/.NET business applications, from requirements analysis through testing and production deployment.
- Design and development of REST APIs and business services, including product/e-commerce data flows and third-party platform integrations.
- Implementation of complex business rules and enhancement of applications covering management control, discounts and pricing
- Development of web interfaces using ASP.NET MVC, Razor, Blazor, JavaScript, jQuery and Bootstrap, with a strong focus on UI/UX.
- Development of web interfaces using React, Next.js and TypeScript.
- Unit and integration testing, functional validation, bug fixing, refactoring and software reliability improvements.
- Optimization of SQL processing and queries across SQL Server and DB2, technical documentation and production deployment support.

Full-Stack C# .NET / React Developer

05/2024 - 04/2026

BRAIN EATERS

- Design and development of Brain Eaters in C#/Unity, including software architecture, gameplay systems, UI and development tools.
- Development of web projects using React, Next.js, TypeScript and Node.js, from initial design through deployment.
- Design of responsive interfaces and user journeys with a strong focus on UI/UX.
- Development of REST APIs, third-party service integrations and process automation.
- Independent management of the full development lifecycle: design, architecture, development, testing, Git and production deployment.
- Projects: braineatersgame.com • paulnelaton.com

Security Operations Engineer

11/2019 - 06/2021

VINCI AUTOROUTES

- Automation of security controls, reporting and dashboards.
- Design of patch management processes and system hardening.
- Implementation of log collection and analysis solution using ELK.
- Security operations across critical infrastructure environments (OIV).
- Vulnerability management and remediation using Qualys and Alsid.
- PAM / IAM administration using CyberArk.

DevOps Engineer

08/2019 - 10/2019

CYCLAD

- Automation of network and security equipment compliance using Ansible, Bash and YAML.
- Development of orchestration scripts and automation of configuration compliance controls.
- Analysis and resolution of Level 1 and Level 2 technical incidents.

Cybersecurity & DevOps Engineer

06/2018 - 12/2018

BRITISH TELECOM

- Automation of security incident detection workflows.
- REST API integration and interconnection of RTIR, TheHive and ELK platforms.
- Deployment and integration of the CyberArk PAM solution.
- Contribution to PDIS security and compliance requirements.
- Technical documentation in an international environment.

Network Security Engineer

02/2017 - 04/2018

ORANGE CYBERDEFENSE

- Maintenance and operational support of security infrastructures.
- Administration of network security solutions including firewalls, proxies and DNS.
- Incident and service request management across an international environment.
- Operation of infrastructure management and monitoring tools.

Network & VoIP Administrator

11/2015 - 12/2016

5ÈME AVENUE

- Deployment of network, security and VoIP infrastructures for small and medium-sized businesses.
- Planning, coordination and execution of technical deployments and on-site interventions.
- Client-facing requirements gathering and project follow-up.
- Contribution to the design and launch of an IP telephony service offering.
- Training in project management fundamentals.
