EDUCATION & CERTIFICATIONS

2016
Engineering Degree in Networks, Systems and Security
AFTI (Orsay)

2015
Bachelor's Degree in Computer Science
University of Franche-Comté

2014
DUT Computer Science
IUT of Belfort

TECHNICAL SKILLS

Software Engineering

C# / .NET · Node.js · TypeScript · React / Next.js · REST APIs · SQL · Object-Oriented Programming

Engineering Practices

System Design · CI/CD · Git · Automation & Scripting · Agile Development · Scalable Systems · Clean Code · Design Patterns · SOLID Principles

Product & Functional

Business Analysis · Functional Analysis · Feature Design · Product Structuring · Product Thinking

LANGUAGES

French : Native

English : Professional proficiency

Portuguese : Fluent

PROFESSIONAL EXPERIENCE

Full-Stack Developer — *2026*

INDEPENDENT PROJECT

- Designed and developed a personal web platform (React / Next.js / Node.js).
- Built an automated CV and skills portfolio generator optimized for ATS.
- Developed a responsive and user-friendly frontend interface.
- Integrated APIs and implemented dynamic PDF generation using Puppeteer.
- Portfolio: https://paulnelaton.com/

Software Engineer — *2024 - 2026*

INDEPENDENT PROJECT

- Designed and implemented a modular architecture in C# (.NET / .NET Core), ensuring scalability and maintainability.
- Managed project as a solo developer, combining technical execution, product structuring and delivery ownership.
- Developed core systems and algorithms, including procedural world generation, city management and state-driven game logic.
- Delivered end-to-end features across the full stack: backend systems, UI integration and web interface (React / Next.js).
- Led development across the full product lifecycle, from system design and feature definition to implementation and optimization.
- Structured project execution with clear planning, prioritization and iterative delivery (roadmap, milestones).
- Defined product vision, built and maintained the roadmap, and prioritized features based on gameplay and user experience objectives.
- Portfolio: https://braineatersgame.com/

SecOps Engineer — *2019 - 2021*

VINCI AUTOROUTES

- Automated security controls, reporting and dashboards to improve MCO efficiency.
- Designed patch management and system hardening processes.
- Implemented centralized log collection and analysis using ELK stack.
- Maintained and secured high-availability infrastructures (Windows, VMware, Solaris).
- Led security implementations on critical infrastructures (OIV).
- Managed vulnerability assessment and remediation (Qualys, Alsid).
- Administered PAM solution (CyberArk) and contributed to identity security.
- Contributed to SOC setup and incident response (L2/L3).
- Performed threat investigations on real-world attacks (Emotet, Netlogon CVE-2020-1472).

DevOps & Automation Engineer *2018 - 2019*

BRITISH TELECOM

- Automated detection and escalation workflows via REST API integrations.
- Integrated and interconnected SIEM platforms (RTIR, TheHive, ELK).
- Automated network compliance using Ansible.
- Developed orchestration scripts and internal tooling.
- Produced technical documentation in an international environment.

Network Security Engineer *2017 - 2018*

ORANGE CYBERDEFENSE

- Operational maintenance for Air Liquide's global security infrastructure.
- Firewall administration (Checkpoint, Cisco ASA, Fortinet, Palo Alto).
- Proxy management (Zscaler) and DNS security solutions (F5).
- N1/N2 incident management in a global multi-site environment.

Network and VOIP Administrator *2016 - 2017*

5ÈME AVENUE

- Management of infrastructure deployments for clients.
- Planning and organization of technical interventions.
- Direct client interface for requirement definition and deployment follow-up.
- Participation in the design and launch of a new IP telephony offering.
- Internal SFR training on project management fundamentals.
