PAUL NELATON

SECOPS ENGINEER & FUNCTIONAL SPECIALIST

Mobility Montpellier / Toulouse / Besançon

SecOps Engineer with a strong functional mindset, specialized in securing critical infrastructures and industrializing security processes. Combines cybersecurity, automation and system analysis with the ability to structure environments, improve processes and deliver efficient solutions to operational and organizational challenges.

EDUCATION & CERTIFICATIONS

2019-2020
Certifications
Zscaler ZCCA / ZCCP

2016
Engineering Degree in Networks, Systems and Security
AFTI (Orsay)

2015
Bachelor's Degree in Computer Science
University of Franche-Comté

TECHNICAL SKILLS

Cybersecurity

Vulnerability Management (Qualys, Alsid) | PAM (CyberArk) | SIEM / ELK | Threat Detection & SOC | Incident Response | Security Hardening | Firewalls | Proxy

Systems & Infrastructure

Windows Server | Linux | Active Directory | VMware ESXi | IAM | SCCM

Automation & Functional

C# / .NET | PowerShell | Python | Ansible | REST APIs | Automation & Scripting | Functional Analysis

LANGUAGES

French : Native

English : Professional proficiency

Portuguese : Fluent

PROFESSIONAL EXPERIENCE

Software Engineer — *2024 - 2026*

INDEPENDENT PROJECT

- Designed and developed a modular software architecture in C# (.NET / .NET Core), focused on performance, maintainability and scalability.
- Managed the project end-to-end as a solo developer: structuring, planning, prioritization and delivery.
- Developed complex systems and algorithms (procedural generation, business logic, state management).
- Delivered full-stack features: backend systems, UI integration and web interface (React / Next.js).
- Applied software architecture best practices (modularity, separation of concerns, SOLID principles).
- Adopted an industrialization approach: component structuring, automation and performance optimization.
- Continuously improved skills in system architecture, performance and reliability.
- Portfolio: https://braineatersgame.com/

SecOps Engineer — *2019 - 2021*

VINCI AUTOROUTES

- Automated security controls, reporting and dashboards to improve operational efficiency (MCO).
- Designed and industrialized patch management and system hardening processes.
- Implemented centralized log collection and analysis using ELK in a SOC context.
- Maintained and secured critical high-availability infrastructures (Windows, VMware, Solaris).
- Led security operations on sensitive infrastructures (OIV).
- Managed vulnerability assessment and remediation (Qualys, Alsid), including Active Directory.
- Administered and secured privileged access using a PAM solution (CyberArk).
- Contributed to identity security (IAM / Active Directory) and access management.
- Participated in SOC setup and handled security incidents (L2/L3).
- Performed threat investigations on real-world attacks (Emotet, Netlogon CVE-2020-1472).

Cybersecurity & DevOps Engineer *2018 - 2019*

BRITISH TELECOM

- Automated detection and escalation workflows through API integrations.
- Integrated and interconnected SIEM platforms (RTIR, TheHive, ELK).
- Automated network and security compliance using Ansible.
- Contributed to the integration of PAM solutions.
- Produced technical documentation in an international environment.

Network Security Engineer *2017 - 2018*

ORANGE CYBERDEFENSE

- Maintained global security infrastructures for Air Liquide (international scope).
- Administered network security solutions: firewalls (Checkpoint, Cisco ASA, Fortinet, Palo Alto), proxy (Zscaler) and secure DNS (F5).
- Handled incidents and requests across multiple technologies (L1/L2), ensuring full resolution.
- Analyzed client needs and adapted security solutions accordingly.
- Used monitoring and management tools (Tufin, ServiceNow, Centreon, IPAM).
- Operated on a large-scale perimeter: firewalls across Europe & America, global proxy and endpoint protection.

Network & VoIP Administrator *2016 - 2017*

5ÈME AVENUE

- Deployed network, security and VoIP infrastructures for SME clients.
- Planned, coordinated and executed technical interventions.
- Interfaced with clients for requirement gathering and project follow-up.
- Contributed to the design and launch of an IP telephony offering (XiVO).
- Completed internal SFR training on telecom deployment project management.
